

Exciting times at ComplyWith – Improving the tool for you

David Woodnorth, ComplyWith's Leader and Ideas Man, introduced the exciting improvements planned for the ComplyWith tool and showcased recent enhancements.

ComplyWith is bringing its humanising mission to life

David explained how ComplyWith's new website and improvements to the tool are bringing the vision of humanising the law to life.

The ComplyWith website showcases the new ComplyWith brand. With more information than ever before it includes: Why ComplyWith, Success Stories, and the ability to search for customer organisations by sector.

The recently launched new user screen and corrective actions modules are simple, intuitive, and part of the ComplyWith development roadmap for the ongoing enhancement of the tool.

What's coming up?

Over the next year, ComplyWith will focus on giving better visibility of law changes relevant to each customer, a new review results screen, improvements to the content library, and incremental changes to the admin module.

David revealed the new review results screen which is due for release in July 2018. It will enable users to access everything they need to know about a compliance survey's progress and results from 1 screen, and then with just 1 click view more information, send emails, and download reports.

Improving the Admin module is key

The session ended with a group brainstorm on the best new things for the Admin module. The suggestions flowed with key themes being easy and on-line help, more intuitive set up, and the ability to easily make changes.

David thanked the group for their valuable insights, and said they would help ComplyWith create a 'much more intuitive experience' and a tool that is 'really simple to come back to'.
